New Mexico Economics Day

***A Compilation of New Mexico-centric
Economics Research (2012-2023):
by
University of New Mexico
Economics Faculty***

UNM Economics faculty members regularly publish economics research on issues, and using data, where the focus can be international, national or regional in nature. Such research is published in a variety of disciplinary (economics) and interdisciplinary outlets, and can be reviewed on faculty webpages at: <https://econ.unm.edu/>

More selectively, here we provide a compilation of economics research by UNM faculty that is *New Mexico-centric*, and focused on or about New Mexico issues, and using New Mexico data. The compilation includes: (I) Journal Articles, Books and Book Chapters; and (II) Technical Reports and White Papers.

Please feel free to contact any individual **Economics faculty member** (current and former) to get copies of their research. Most papers can be accessed through web sources like Google Scholar. The compilation shows multiple outputs annually, with 103 different NM-centric entries over the last dozen years, involving 22 different UNM Economics faculty members (current and former). As shown, this research tends to be highly collaborative, and regularly involves UNM graduate students as co-authors.
